

TRNA CCB Build KPI Snapshot

AI-assisted creation of the TRNA Compliance Clipboard

94

COMMITTS SHIPPED

8,539

TRACKED LINES

~20 h

ESTIMATED ACTIVE BUILD TIME

15.75

CALENDAR DAYS

Build Effort Comparison

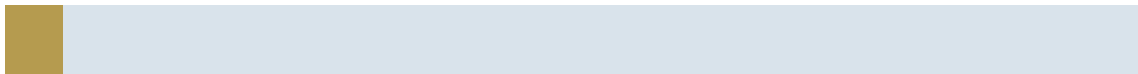

Estimated active effort based on repository history and public labor assumptions.

WITH CODEX

~20 active hours

NO-AI PROTOTYPE

160-320 hours

Exact Codex thinking time is not exposed; active time is estimated from commit timing with idle gaps capped.

AI MODEL COST ESTIMATE

\$30-
\$160

rough token-cost scenario

NO-AI PROTOTYPE

\$16k-
\$45k

internal build effort

Delivered Capability

Frontend app

Lambda backend

DynamoDB state

API Gateway

GitHub deploy

Daily Watch

Customer enrichment Impact reviews

Based on repo history and public pricing assumptions. Production hardening still requires SSO, monitoring, backups, tests, and deployment governance.
